ABHIJEET GUPTA

FULL STACK .NET DEVELOPER | AI/ML & GENERATIVE AI

Ghaziabad, Uttar Pradesh, India · +91 8384039414 · guptaamarjeet105@gmail.com
LinkedIn · GitHub profile

PROFILE

Full Stack .NET Developer with 3+ years of experience building and maintaining ASP.NET MVC applications for clients in education and oil & gas. Skilled in C#, REST APIs, SQL Server, and responsive front ends using JavaScript, HTML, CSS, and Bootstrap. Recently completed an AI, Machine Learning, Deep Learning, and Generative AI program through HCL GUVI, with hands-on projects in analytics dashboards, image classification, recommendation systems, and data analysis. Earlier experience in bank audit and KYC operations strengthened attention to data accuracy, compliance, and stakeholder communication.

TECHNICAL TOOLKIT

Backend	C#, .NET, ASP.NET MVC, RESTful APIs
Frontend	JavaScript, jQuery, HTML5, CSS3, Bootstrap
Databases	Microsoft SQL Server, PostgreSQL, MySQL, Oracle, SQLite, SQL query optimization
AI / ML	Python, Machine Learning, Deep Learning, CNNs, transfer learning, NLP, Generative AI
Libraries & Tools	TensorFlow/Keras, scikit-learn, Pandas, NumPy, Streamlit, Plotly, SQLAlchemy, Git/GitHub
Practices	Requirements gathering, debugging, data validation, code reviews, reporting, client delivery

PROFESSIONAL .NET WORK

Warwick Academy — Student Management System

School administration workflows covering lunch booking, attendance tracking, and payment processing.

Technology: ASP.NET MVC · C# · SQL Server · JavaScript · Bootstrap

Scaffpac — Oil & Gas Supply Chain Platform

Material supply management, cost invoicing, and inventory control for an industrial supply workflow.

Technology: ASP.NET MVC · C# · SQL Server · HTML · CSS

Monadel, Wacco & Inpex — Industrial Supply Systems

Applications supporting material supply tracking, cost management, and inventory reporting.

Technology: ASP.NET MVC · C# · REST APIs · SQL Server

AI/ML PROJECTS

Brand Visibility Intelligence Dashboard — AI/ML Capstone · HCL GUVI

Built a workflow to retrieve shopping data through SerpAPI, combine it with a product dataset, clean and load the data into PostgreSQL, engineer visibility and pricing features, and display interactive filters across six Streamlit tabs.

Technology: Python, Pandas, SQLAlchemy, PostgreSQL, Streamlit, Plotly, SerpAPI

RecycleVision — Garbage Image Classification — Deep Learning · Computer Vision

Built an image-classification pipeline with data augmentation, compared MobileNetV2, EfficientNetB0, and ResNet50, and selected a model using macro F1-score. Delivered a Streamlit app with image upload, confidence score, and top-three predictions.

Technology: Python, TensorFlow/Keras, CNN, Transfer Learning, scikit-learn, Streamlit

Audible Insights — Book Recommendation System — Machine Learning · Recommendation Systems

Created content-based, clustering-based, and hybrid recommenders from merged Audible catalog datasets using TF-IDF, cosine similarity, and K-Means. Added price and rating filters, CSV export, and an insights dashboard.

Technology: Python, scikit-learn, NLTK, Pandas, TF-IDF, K-Means, Streamlit

Cricbuzz LiveStats — Cricket Analytics Dashboard — Data Analytics · SQL

Built a multi-page Streamlit app using Cricbuzz API data via RapidAPI and SQLite. Implemented 25 SQL queries spanning filters, CTEs, and window functions, along with CRUD operations for players and matches.

Technology: Python, SQLite, Streamlit, Plotly, Pandas, RapidAPI, SQL

Real Estate Investment Advisor — Machine Learning · Real Estate Analytics

Analysed an India housing-prices dataset to explore property profitability and future-value prediction for investment decisions. Add the exact model, evaluation results, and project repository details when confirmed.

Technology: Python, Housing-price dataset

EXPERIENCE SNAPSHOT

ASP.NET MVC Full Stack Developer | Baans Consulting Services, Ghaziabad | May 2023 – Present

• Build and maintain ASP.NET MVC business applications for Australian clients, contributing across requirements, development, testing, and deployment activities.

• Developed features for Warwick Academy's student management system, including lunch booking, attendance tracking, and payment-processing workflows.

• Worked on four oil & gas supply-chain platforms—Scaffpac, Monadel, Wacco, and Inpex—supporting material supply, cost invoicing, inventory management, and reporting workflows.

• Implement application functionality using C#, SQL Server, REST APIs, JavaScript, HTML, CSS, and Bootstrap.

Junior Associate / Audit Manager | 3i Infotech BPO Ltd, Noida | September 2019 – July 2022

• Handled audit and KYC processes for RBL Bank, verifying documentation and validating customer data in line with process and compliance requirements.

• Trained and supported junior staff on audit procedures and compliance protocols.

• Coordinated with internal teams to manage seasonal workloads and meet project deadlines.

• Contributed to process improvements focused on customer service and operational consistency.

EDUCATION & CERTIFICATIONS

• AI, Machine Learning & Generative AI Program — HCL GUVI (Completed)

• GNIIT Certification in Software Engineering — NIIT, Noida (April 2023)

Master of Computer Applications (MCA) — IGNOU, Noida | 2021–2023

Bachelor of Computer Applications (BCA) — IGNOU, Noida | 2018–2022 | 64%

GNIIT Diploma, Mobile & Software Development — NIIT, Noida | 2019–2023 | Excellent Grade
